ABOUT PUMPTech ENGINEERED SYSTEMS

For the Best in Flow Technology

At PumpTech Inc. we design, manufacture and service chemical metering systems and components. From the tank to the injection quill, we take pride in providing quality products, exceptional service, and competitive prices. With an experienced engineering group on staff, along with ASME certified welders and fabricators, we have the ability to design and build a system that will more than meet your expectations. In addition, we are a UL Listed company and will provide a complete UL or cUL listed packaged pump system.

Once your system is built, we provide complete on site startup service and training along with offering long-term service contracts on all our systems. Service alliances are an important part of our business; we are committed to building partnerships with all our customers.

Formerly manufactured and sold under the Meterman brand, PumpTech Engineered Systems (PES) offers a complete range of pumps, instruments, valves, tanks and accessories to meet your needs. As an original equipment manufacturer (OEM), PES can source the specific brand or configuration your project requires.

With a PES you get the security of knowing that your system has gone through a rigid inspection and test plan that includes documented hydrostatic and performance testing. All PumpTech Engineered Systems come with a complete set of O&M manuals that include a complete drawing package with electrical and mechanical 2D and 3D drawings. With PES, when your system arrives on site you know it is ready to go.

PumpTech Engineered Systems

Your single source for chemical pumping solutions.

PES FEATURED PRODUCTS

Power Generation

Heavy duty stainless framed or platform skids.
Complete package from tank to the injection quill
along with instrumentation and control panel.

- ASME standards including B31.1 and B31.3
- ASME Certified Welding
- UL, cUL Listed Control Panel
- Hazardous Rated Packages Class 1, 2 & 3 Division 1 & 2
- Thorough Inspection and Testing to include hydrostatic and performance testing, penetrate and/or radiographic testing as required.
- Complete document package to include:
 - 2D and 3D drawings
 - Testing documentation
 - Operation and Maintenance Manual
- Industry Specific Systems
 - Antifoam
 - Oxygen Scavenger
 - Amine/Ammonia
 - Polymer
 - Surfactant
 - Coagulant
 - Sodium Hypochlorite
 - pH Control
 - Phosphate

Phosphate Feed Skid

Pulp and Paper

Complete rugged stainless steel skid packages
from tank to the injection quill along with
instrumentation and control panel.

- All Wash Down Duty systems
- Stainless, PVC, Kynar Pipe threaded or welded
- Compression Tube fittings
- UL, cUL Listed Control Panels
- Flow, level, pressure and temperature control
- Paper Industry Specific Systems
 - ASA
 - Biocide
 - Dye
 - Defoamer
 - pH Control
 - Polymer Make Down
 - Dry/Liquid
 - Retention Aid
 - Wet and Dry Strength

Oil and Gas

Heavy duty stainless framed or platform skids.
Complete package from tank to the injection quill
along with instrumentation and control panel.

- ASME standards including B31.1 and B31.3
- ASME Certified Welding
- UL, cUL Listed Control Panel
- Hazardous Rated Packages Class 1, 2 & 3 Division 1 & 2
- Thorough Inspection and Testing to include hydrostatic and performance testing, penetrate and/or radiographic testing as required.
- Complete document package to include:
 - 2D & 3D drawings
 - Testing documentation
 - Operation and Maintenance Manual
- Industry Specific Systems
 - Antifoam
 - Oxygen Scavenger
 - Amine/Ammonia
 - Polymer
 - Surfactant
 - Coagulant
 - Sodium Hypochlorite
 - pH Control
 - Phosphate

Antifoam Skid

Municipal: Water/Waste Water

High quality, low maintenance systems designed
for water/waste water industry.

- Thorough Inspection and Testing to include hydrostatic and performance testing
- Complete document package to include:
 - 2D & 3D drawings
 - Testing documentation
 - Operation and Maintenance Manual
- Startup and Training
- Onsite Service and Repair
- Industry Specific Systems
- Sodium Hypochlorite
 - Bulk Feed
 - Onsite Generation
 - Gas
- pH Control
- Polymer Make Down and Feed
 - Liquid/Dry
- Fluoride

State of the Art Engineering

The Newest Technology

In today's economy, it is vital that companies maximize their competitive edge, not only with pricing, but with quality that surpasses the competition. One way PumpTech insures quality in our packaged pump systems is to design them right the first time.

PumpTech engineers utilize a state of the art 3D drafting tool called SolidWorks®. This eliminates common errors in drafting that can affect the integrity of the pumping system while generating precise shop drawings and 3D graphics that allow you to see what the finished product will look like.

This technology provides increased efficiency in our shop and more accurate bill of materials, which translates to a competitive price and higher quality than our competition.

Not only that, SolidWorks® will create a 3D interactive drawing that can be e-mailed, then manipulated by it's recipient, without special software.

If you would like a sample of PumpTech's Engineered Systems sent to you, utilizing this state of the art engineering, please email us at: inquiries@pumptechnw.com.

Custom Chemical Feed Cart

4-Pump Feed System with Make Down Tank.
